CAMILO ALEJANDRO CABRERA GONZÁLEZ

Systems Engineer | Software Development, Infrastructure, Databases & IT Support

Cali, Colombia (UTC-5) · Open to on-site, hybrid or remote work · +57 302 676 2269 · camiloalejo29@hotmail.es
Portfolio: ccabrera.netlify.app · LinkedIn: linkedin.com/in/camilo-cabrera-95464533b

PROFESSIONAL SUMMARY

Systems Engineer with 4+ years of experience building and running technology in production: full-stack development (Node.js, NestJS, Angular, React), SQL Server and PostgreSQL databases, cloud (AWS, Azure), and IT infrastructure and support in the healthcare and financial sectors. Has automated processes that cut processing times by 35%, managed platforms of 15 servers, and delivered complete solutions from requirements gathering to production. Combines a technical and business mindset, learns fast, and uses artificial intelligence to deliver more, with higher quality. English B2.

TECHNICAL SKILLS

Backend Development: Node.js, NestJS, TypeScript / JavaScript · REST APIs · microservices · JWT authentication · Python (FastAPI), C# / .NET, Java

Frontend Development: Angular (Standalone Components, Signals, major version migrations), React, Next.js · HTML5, CSS3 · React Native

Databases: SQL Server, PostgreSQL, Azure SQL, MongoDB · T-SQL · relational modeling · backup, restore and migration · query optimization · security and access control

Cloud & DevOps: AWS (Lambda, EC2) · Azure (Azure SQL, Virtual Machines) · Docker · Git / GitHub · GitHub Actions (CI/CD) · Vercel · software testing

Infrastructure & IT Support: Help desk under ITIL practices · ticket and incident management · Active Directory · Office 365 · hardware and software support · networking · Windows and Linux servers · backups · inventory and licensing

Data & Management: Power BI · SQL · Excel · KPIs · process automation · requirements gathering · project management · Scrum, Kanban · team leadership

AI, Security & Languages: Generative AI, AI agents, Claude Code · cybersecurity (certificate program) · data protection · AML compliance (SARLAFT) · Spanish (native) · English B2

WORK EXPERIENCE

Full-Stack Developer (Web & Mobile) | Freelance – Cali, Colombia — Aug 2026 – Present

Build custom web and mobile applications for small and medium-sized businesses, with 3 projects delivered to date, from gathering requirements with each client through production deployment and ongoing support. Develop REST APIs and microservices with Node.js, NestJS and TypeScript, user interfaces with Angular, React and Next.js, and model databases in PostgreSQL and MongoDB. Implement serverless functions with AWS Lambda and deploy to EC2 and Vercel using Docker and GitHub Actions pipelines, relying on AI tools to develop, test and document.

IT Assistant | Cootraemcali (Financial Cooperative) – Cali — May 2026 – Jul 2026

Managed a platform of around 15 servers, ensuring the availability and continuity of financial services, and provided help desk support under ITIL practices for hardware, software and networking, resolving 80+ tickets per month, along with user and access management in Active Directory. Designed and built from scratch an enterprise backup tool in C# / .NET 8 using Clean Architecture, which automated user data backups and was deployed to production. Also configured the company's information systems and applied data protection and AML (SARLAFT) compliance controls.

Systems Technologist | Hospital San Juan de Dios – Cali — Mar 2024 – Mar 2026

Designed and implemented internal applications that automated workflows and reduced processing times by 35%. Built the technical solution for regulatory report Circular 030 on top of the hospital's databases, tracking 40,000+ claims, payments, billing objections and credit notes, and produced regulatory reports (FT025) through SQL queries, meeting 100% of deadlines. Also provided technical support to users, including Office 365 account and service administration, and managed servers, networks, and backup and disaster recovery plans.

Full-Stack Developer | Freelance Projects – Cali — Oct 2022 – Mar 2024

Built web applications and e-commerce stores end to end with Node.js, NestJS, Angular, React and Next.js, including migrating applications across major Angular versions. Integrated payment gateways, authentication and third-party APIs, managed code with Git and deployed to the cloud (AWS, Vercel), delivering under agile methodologies.

Computer Labs Coordinator | Universidad Libre – Cali — Jan 2022 – Oct 2022

Coordinated a team of 6 support technicians, led software development projects including the testing phase, and managed inventories, software licenses and databases.

FEATURED PROJECTS

EROSELLE – Premium lingerie e-commerce — online store in production (eroselleshop.com) with a Next.js frontend and a Node.js backend: product catalog, JWT authentication, transactional emails and a cloud database. *Next.js · TypeScript · Node.js · Prisma · PostgreSQL*

Finanzas Pro – Personal finance mobile app — Android app for personal finance and sales tracking, offline-first with local notifications; used daily. *React Native · Expo*

IT inventory and maintenance management system — tracks IT equipment and its maintenance history. *Next.js · PostgreSQL*

EDUCATION

- B.Sc. in Systems Engineering – Institución Universitaria Antonio José Camacho, Cali (Aug 2022 – Dec 2024)
- Cybersecurity Certificate Program – Institución Universitaria Antonio José Camacho, Cali (Dec 2024 – May 2025)
- Information Systems Technologist – Fundación Centro Colombiano de Estudios Profesionales, Cali (Jan 2017 – Jan 2020)
